

PLEASE DO NOT FEED US!

No matter what we say!

meander.tas.gov.au/wildlife

Let wild ducks stay wild.

Feeding waterfowl may feel kind, but it tips the balance. Introduced breeds – like geese and domestic mallards – are louder, larger, and pushier. They outcompete our quiet native ducks for space and food. Take away the food, and introduced birds are more likely to move on.

To help our native species thrive, resist the urge to feed. Instead, linger by the riverbank. Watch their gentle paddles, their soft dives, their hidden nests. Learn their names. Spot their colours. Let your curiosity be the gift you give. **Love our wildlife? Scan the QR code to learn how you can help keep our unique and beautiful wildlife safe.**
